

## Hawthorn Bay Pty Ltd – Suppliers of High Quality Soap Moulds

[www.hawbay.com.au](http://www.hawbay.com.au)

Hawthorn Bay Soap Moulds are made from PVC with a stiffening edge all around.

They have a hole at the top so that can hand easily when not in use.

They are flexible enough so that you can move the mould to release the soap.

**Please Note:** All sizes are in millimetres (mm).

They can also be used for beeswax, plaster moulding, wax shapes, etc.

### Guest Soaps

### Divider Moulds

*Original Design by Aquasapone*

We currently have wooden rectangular divider moulds. Both sizes of our wooden soap moulds use acrylic dividers.

The moulds are suitable for cold pour and hot pour. The acrylic dividers can be disassembled for easier cleaning. Lining the trays makes for easier unmoulding and cleaning, and each size comes with a re-useable plastic liner.

The large rectangular divider mould, HBW1, produces 42 bars of soap of 72 x 46 mm and is suitable for batches between 3kg and 9kg approx.

The small rectangular divider mould, HBW4, is suitable for sample work, produces 16 bars of soap 76 x 50mm and is suitable for batches of 2kg approx.

The thickness of each bar can be adjusted based on individual needs. No trimming is required, and the resulting shape is a perfect parallel piped with smooth, shiny sides, that is extremely easy to wrap. It is also very easy to make layered soaps or larger soap 'blocks', which can then be cut into smaller bars.

#### *Wooden Divider Moulds*
